LAW ENFORCEMENT IN THE FIELD

Wi-Fi

3G, 4G

POLICE STATION

Background

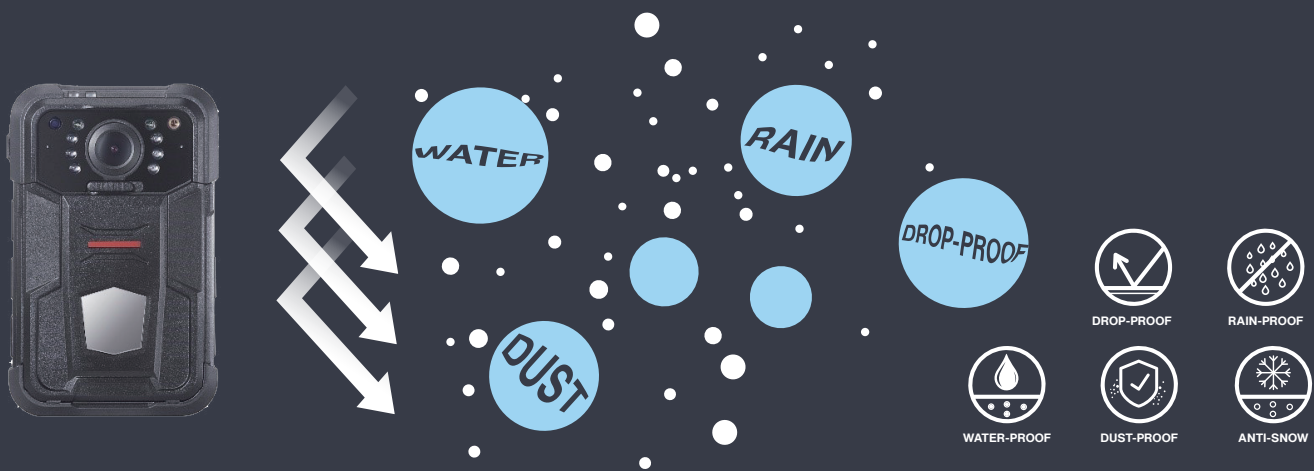

Law enforcement personnel have no time to waste getting to the right place at the right time. But situations can get out of control quickly. At times, they can't call for backup when it's desperately needed, or there is no compelling evidence in the event of a dispute.

Law enforcement personnel need specially designed equipment to protect themselves, to facilitate evidence management, and to help take control in an emergency. When officers need audio and video equipment to go where they go and stay connected for well-informed operations, they need Hikvision's Lightweight Mobile Enforcement Solution.

Reliable Performance on the Go

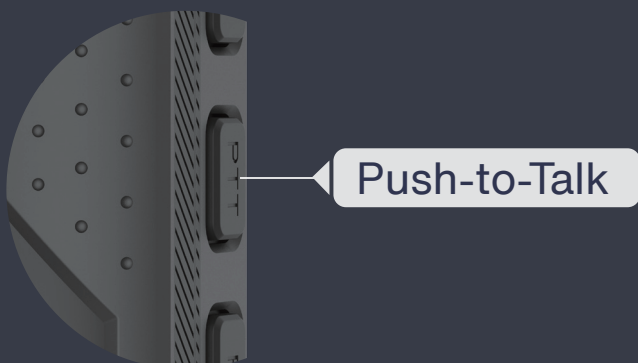

Compact and Rugged Design

Tested and proven countless times in the field, Hikvision's Body Worn Cameras are tailored for the rigors of duty. They are compact and easy to use, resisting dust, rain, and snow with water-proof and drop-proof exteriors. The robust design ensures stable video recording even when users are in adverse environments or the midst of action.

Easy and Intuitive Operation

Hikvision's Body Worn Cameras feature a large recording button on the front and, on the side, buttons to switch to mute mode, tape audio clips, send out alarm signals, and activate other handy functions. All contribute to easier one-handed operation on the move – even with gloves on.

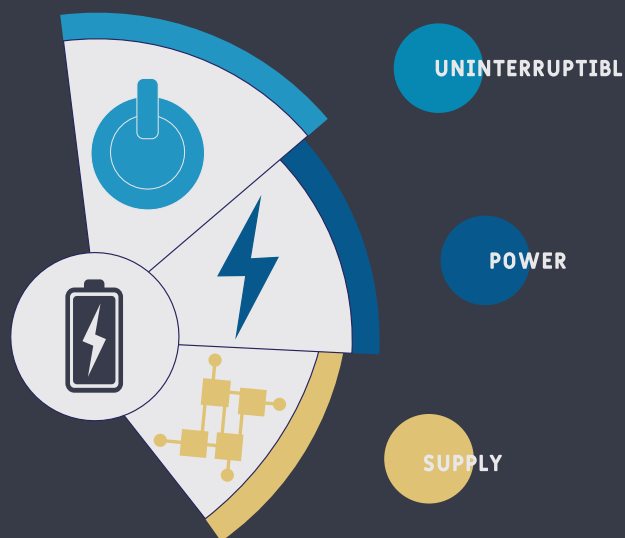

Calling for Backup

The Push-to-Talk button on Hikvision's Body Worn Cameras (on select models) enables two-way audio, setting the device as a mic and loudspeaker. This way, users can communicate with the police station to call for backup and more, any time.

Extra-Long Recording Time

Hikvision's Body Worn Cameras record high-definition video for up to 12 hours on a single charge. Shift-long recording means longer connection time and better protection. Moreover, the rechargeable battery (on select models) can be detached and changed on the go, so users won't run out of power even on extended shifts.

Flexible Mounting Options

Hikvision's Body Worn Cameras go with a variety of plastic and metal accessories for chest and shoulder mount, perfectly securing the camera to a uniform.

Plastic Clip

Metal Clip

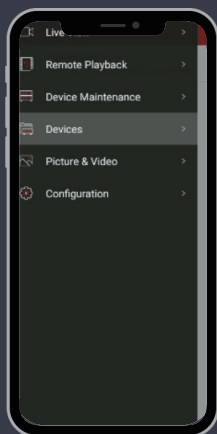

Fast Click

Magnetic Clip

Chest Harness

Body Camera Assistant App

The app supports categorizing, live viewing, and playing back of video footage on a mobile phone.

Situation Awareness in the Center

Real-Time View of Enforcement

Staff at the command center can instantly get a video stream of law enforcement personnel on the ground.

Police Location Visualization

The GPS module in Hikvision's Body Worn Cameras uploads each user's location data to the command center in real time, so that command personnel can determine their location and patrol route.

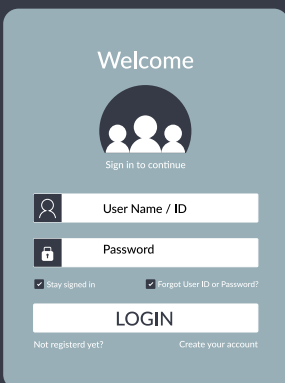

Efficient & Secure Data Management

Data and File Management

Data protection is one of the highest priorities at Hikvision, from video recording on the body worn camera to file management on the dock station. Hikvision takes, for example, the following data protection measures:

1. Data is encrypted following the AES-256 standard during the entire process.
2. Tagged video footage is locked and cannot be overwritten.
3. Only authorized personnel can download footage.

User Authentication

Hikvision Dock Stations provide two authentication methods for multiple users.

1. Authentication using an assigned user number and password
2. Authentication through facial recognition

Product Showcase

DS-MCW406

- TYPE-C interface
- 1.7 inch TFT,128*160
- IR-cut
- 2500mAH battery
- 12h recording at 1080P
- Curved back clip design
- Competitive price
- 80 × 59 × 30 mm, 125g

DS-MCW407(C)/(D)

- DS-MCW407(C): Android;
- DS-MCW407(D): Linux
- DS-MCW407(C): Mini USB interface;
- DS-MCW407(D): TYPE-C interface
- Upgrade copper column bottom contacts
- Support klickfast switching
- 3220mAH battery
- IP68

DS-MH2311(C)

- 1080p @ 30 fps
- H.264, H.265 codec
- 2.4-inch LCD screen
- 3300 mAh replaceable battery for 12 hours of recording
- Built-in GPS, 3G/4G, Wi-Fi modules
- Switchable IR lights
- IP67 ingress protection
- 95 × 60 × 29 mm, 190 g

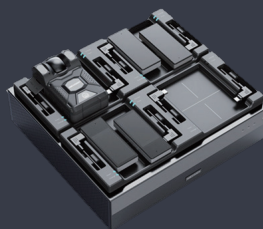

DS-MDS003

- Android & Linux dual-system design
- Wall / desktop / mobile stand mount
- 13.3-inch touchscreen
- 8 body worn camera ports by default; expandable to 32 ports
- 6 hard disks (up to 8 TB each)
- Unlock BWC by facial recognition or password verification
- Type-C version optional

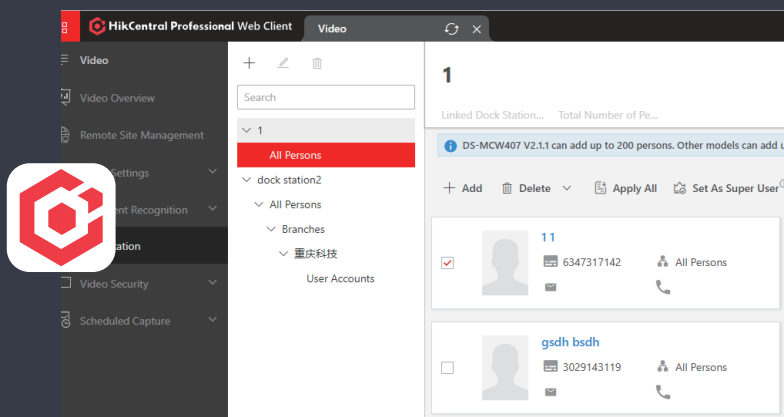

DS-MDS001

- Linux Operation system
- Type-C / mini-USB interface optional
- 8 dock slots, support up to 8 body cameras
- HDD 2T/4T/8T/16T optional
- 400 × 300 × 110 mm

DS-MDS004

- Type-C Interface
- 4 regular BWC or 8 compact nameplate cameras
- Connect the nameplate camera by magnet
- Support 2 HDDs, up to 8 TB for each disk
- 300 × 200 × 60 mm

HikCentral Professional

- Live view & playback
- Alarm linkage
- Two-way audio
- GIS
- Multi-level authority management
